DA/DAW SERIES PILOT OPERATED UNLOADING VALVES

DA/DAW series are pilot operated pressure unloading valves. This series are used to unload the oil pumps pressure in a hydraulic system with accumulator. The valve allows high-pressure pump to operate and low-pressure pump to unload pressure.

80=2-8MPa; 160=8-16 MPa; 315=16-31.5 MPa

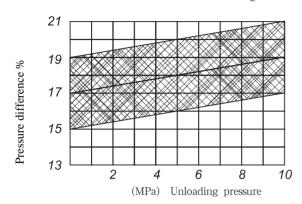

Y=Internally piloted; externally drained

DA DAW

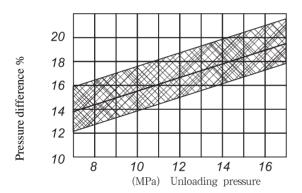

<u>DA</u> <u>W</u> 10 <u>A</u> <u>Model</u>	A - 1 * <u>30</u>	0 / <u>80 Y</u>	' G24	N	<u>Z4</u> /	V * For further details
No code=Without directional valve W= With directional valve						No code=NBR seals for petroleum oils V=FPM seals for phosphate ester
Size=10; 20; 30						Z5L=Quadrate plug with light
A=Normally closed; B=Normally open						No code=Without manual override N=With manual override
1=Adjustable knob 2=Hexagonal nut and protective cap						W220=AC 220V; G24=DC 24V
Series Number				No	o code=	Internally piloted, internally drained

Pressure difference from P-T of a pump

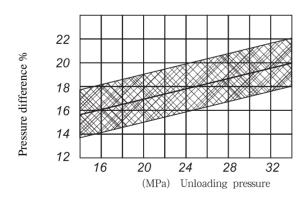

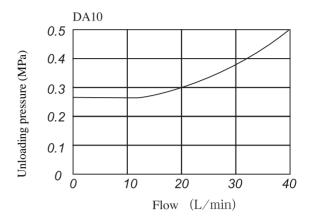

Pressure setting 16 MPa

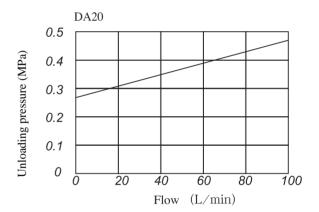

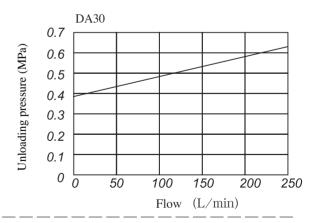

Pressure setting 31.5MPa

Unloading pressure from P-A of a pump

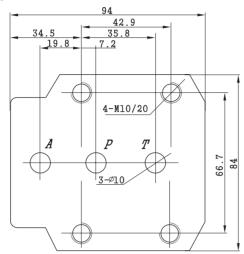

(Control range in hatching area)

Technical data

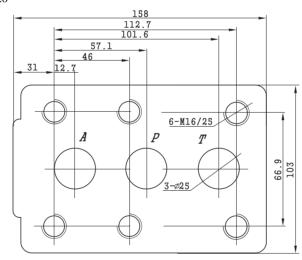

Size	10	20	30			
Input pressure of A port (MPa)		31.5				
Max. Flow	40	100	250			
Fluid temperature (°C)	-20~70					
Filtration	25					

Installation dimensions

DA20

DA30
